

TALL FESCUE

CROSSFIRE III FESCUE

Crossfire III is the proud successor to Crossfire, the turf-type tall fescue that dominated the top rankings in national Turf Trials in recent years. In fact, it outperformed every variety of the 65 tested in Arkansas, Georgia, Oklahoma and Texas—the states with the most severe summers in the NTEP trials. Now it can take even more heat with an enhanced seed endophyte rating of over 80%. Crossfire III also features a darker green color, improved turf quality and better drought tolerance than its award-winning predecessor, making Crossfire III ideal for the “transition” zone and hotter areas of the country.
