

## GRASS SEED

### **KENTUCKY 31 FESCUE**

“5.2” in last OSU trials, traditional fescue. Make sure not to use where horses graze.

Order #: **92-2025** –50 lb. bag –40 per pallet

### **BERMUDA SEED, HULLED ARIZONA**

Most common lawn grass used in Oklahoma.

Order #: **92-355220** –50 lb. bag –40 per pallet

### **ANNUAL RYEGRASS**

Ideal for quick cover crop.

Order #: **92-500** –50 lb. bag –40 per pallet

### **U-3 BERMUDA GRASS SEED**

Improved hybrid blend of Bermuda grass seed grown in Arizona.

Order #: **92-355225** –1 lb. can –10 per case

### **CROSSFIRE II FESCUE**

In last OSU trials; Crossfire II is the proud successor to Crossfire, the turf-type tall fescue that dominated the top rankings in national Turf Trials a few years ago. In fact, it out-performed every variety of the 65 tested in Arkansas, Georgia, Oklahoma and Texas—the states with the most severe summers in the NTEP trials. Now it can take even more heat with an enhanced seed endophyte rating of over 80%. Crossfire II also features a darker green color, improved turf quality and better drought tolerance than its award-winning predecessor, making Crossfire II ideal for the “transition” zone and hotter areas of the country.

Order #: **92-1003** –5 lb. bag –10 per bale

Order #: **92-1002** –10 lb. bag –5 per bale

Order #: **92-1000** –50 lb. bag –40 per pallet

### **WOLFPACK TALL FESCUE**

Good performer at 6.4 in last OSU trials; Wolfpack was selected and bred specifically for brown patch tolerance in an area where brown patch disease is prevalent. As a result, Wolfpack displays an excellent tolerance to brown patch. Wolfpack is a dark green, moderately low growing, turf-type tall fescue cultivar resembling Turf-Seed’s Coronado tall fescue, with improved summer performance due to excellent heat tolerance. Wolfpack is widely adapted and has shown very good persistence in turf trials.

Order #: **92-2075** –50 lb. bag –40 per pallet

### **HOUNDOG 5 TALL FESCUE**

Recognized as among the very best in mean turfgrass quality ratings for turf-type tall fescue cultivars, Houndog 5 represents unparalleled achievements in turfgrass breeding technology. Its diverse genetic background means Houndog 5 will deliver excellent turf density, a lush dark green color and resistance to a broad spectrum of turf diseases commonly found in warm and cool climatic regions of the U.S. Developed specifically for permanent turf on home lawns, sportsfields, commercial and municipal grounds in regions where tall fescue is adapted.

Order #: **92-2090** –50 lb. bag –40 per pallet

### **VIP PERENNIAL RYEGRASS BLEND**

VIP is a blend of three top ranked Turf Type Perennial Ryegrasses. The blend provides outstanding drought tolerance, excellent seedling vigor and one of the most wear tolerant formulas available for golf courses, home lawns, and parks.

Order #: **92-5025** –50 lb. bag –40 per pallet

### **MANHATTAN 4-PERENNIAL RYE**

This excellent perennial rye scored “5.6” in the last OSU trials; offered in TQ-tournament quality seed.

Order #: **92-5026** –50 lb. bag –40 per pallet
